COURSE SYLLABUS

Nursing Care in Penitentiary

2021-2-I0101D122

Aims

The main purpose is to allow students to approach to the world of penitentiary nursing and to the world of Operating Units of Protected Medicine by acquiring theoretical knowledge, with a view to a possible future approach with the inmate patient.

This training course has three fundamental objectives :

Show the students the reality of care in penitentiary, especially the various organizational models in this field in order to be able to contribute to a change and an improvement ;

Improve students' ethical approach in order to appear to the inmate patient with solid values, paying particular attention to the issues of life in prison.

Show students the importance of collaboration between nurses and prison officers: often it is not easy, but reach a common aim is essential.

Contents

Notes regarding the legislation that regulates the nursing profession;
