COURSE SYLLABUS

Preventive Dentistry

2021-2-H4601D010

Aims

PREVENTIVE AND COMMUNITY DENTISTRY
The course aims to provide students with the tools necessary to arrive at an effective prevention of caries and the main periodontal diseases.

SURGICAL PATHOLOGY AND CLINICAL PROPEDEUTICS
The course aims to provide the basic knowledge of general surgery and common surgical procedures in dental practice

Contents

PREVENTIVE AND COMMUNITY DENTISTRY
Trends in caries disease and relationships with individual, social and environmental characteristics. Evaluation of its incidence and prevalence. Levels and types of prevention. The main prevention strategies applicable to health protection from the point of view of prevention of caries and the onset of dysgnathias.

SURGICAL PATHOLOGY AND CLINICAL PROPEDEUTICS
Principles of technique in general surgery, preoperative patient assessment, fundamentals of cancer surgery, elective surgery and emergency surgery

Detailed program

The extended program is further detailed within the individual modules

Prerequisites

Teaching form

Frontal lessons (During the Covid-19 emergency period, lessons will take place in mixed mode: partial presence and asynchronous / synchronous videotaped lessons)

Textbook and teaching resource

Provided by the teacher on web platform

Semester

First semester

Assessment method

The oral exam will be used (During the Covid-19 emergency period, the oral exams will only be telematic. They will be carried out using the WebEx platform and a public link to access the exam will be given on the e-learning page of the course)

The exam is intended to test the knowledge and skills acquired in the different modules that make up the teaching.

The student will be assessed by the teachers of both modules that make up the course.

Office hours

Mon-Fri, by appointment
