SYLLABUS DEL CORSO

Psychiatry II

2526-5-H4102D091-H4102D132M

Aims

The aim of this course is to provide the students with the basic information on clinical management and assessment of mental disorders and related behaviors (psychomotor agitation and suicidality).

Contents

This course provides a comprehensive overview on main clinical approaches for treatment and assessment of mental disorders.

Detailed program

- Signs and symptoms of mental disorders
- Classification of mental disorders
- Schizophrenia
- Personality and personality disorders
- Alcohol and substance misuse

Prerequisites

Neuroscience 1

Teaching form

Each Lesson (n = 5) will last 2 hours and will include a first part with a frontal approach (called “didattica erogativa– DE”) and a second part with an interactive approach (called “didattica interattiva – DI”). Four lessons will be provided in attendance, one lesson using distance teaching.

Textbook and teaching resource

- Paul Harrison, Philip Cowen, Tom Burns, and Mina Fazel. Shorter Oxford Textbook of Psychiatry - 7 edn (2018). Publisher: Oxford University Press Print Publication.
- American Psychiatric Association. (2022). Diagnostic and statistical manual of mental disorders (5th ed., text rev.). Publisher: American Psychiatric Publishing.
- Slides uploaded in the e-learning platform.

Semester

Year 5, semester I.

Assessment method
