DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Cell and Molecular Biology II

1718-1-H4102D002-H4102D007M

Aims

most important biotechnological applications in medicine

Contents

The course will provide the essential theoretical knowledge of biology focusing on the possible future application in the medical field.

Detailed program

Molecular genetic tools (restriction enzymes, vectors, Southern blotting, PCR, sequencing, microarrays).

Prerequisites

Teaching form

group work

Textbook and teaching resource

Semester

first semester

Assessment method

oral exam

Office hours

by appointment
