SYLLABUS DEL CORSO

Diagnosi e Terapia delle Malattie Glomerulari

1718-4-H4101D079

Aims

Update on pathogenesis, diagnosis and treatment of glomerular diseases

Contents

Classification and immunological basis of renal diseases.

Laboratory tests and renal biopsy.

Clinical-pathological correlations and treatment.

Detailed program

1° lesson: classification of glomerular diseases. Genetic and immunological basis. Laboratory tests and renal biopsy.

2° lesson: clinical-pathological correlations and treatment of primary glomerular diseases.

3° lesson: clinical-pathological correlations and treatment of glomerular diseases associated with systemic disorders, including SLE and vasculitis.

Prerequisites

4th year Medical Student and over

Teaching form

Lectures, case reports, microscopy lab (biopsy and sediment)

Textbook and teaching resource

1) Floege J, Johnson RJ and Feehally MA: Comprehensive Clinical Nephrology. Saunders Pub. 2010

 2) Howie AJ: Handbook of Renal Biopsy Pathology. Springer 2008

Semester

Assessment method
