## COURSE SYLLABUS

### Neuroestetica: Arte e Cervello

1718-2-H4101D293

---

#### Aims

Improving knowledge about the neuroscientific basis of artistic production

#### Contents

Description and Objective: The neuro-aesthetics is a new area of research that proposes a neuroscientific approach to understanding the production

and enjoyment of works of art. It 's a discipline that stands alongside the traditional art aesthetic evaluation.

It's an interdisciplinary research field that involves cognitive science, art history, art anthropology, neurophysiology and clinical neurology, neuroimaging techniques. The course aims to provide new knowledge tools in the field of neuroscience and a new methodological approach in cognitive domain.
