SYLLABUS DEL CORSO

Diritto Penale dell'Ambiente

1819-5-A5810107

Learning objectives

The Course aims at providing a good knowledge of principles and environmental crimes, and at fostering critical knowledge of environmental criminal law

Contents

The environmental criminal law, with reference to the sources and structure of crimes. Most important environmental crimes (covering areas such as waste, air and water pollution, electromagnetic pollution, crimes involving the territory and buildings, and new environmental crimes put in force since 2015), treated and discussed in their concrete application of case law, through the analysis of sentences. Students will be asked to participate actively in discussion of cases in class.

Detailed program

Attending students:

critical analysis of principles and environmental crimes, following a case law approach and in frame of constitutional and european duties.

Analysis of the most important environmental crimes (waste, air and water pollution, environmental disaster), studied in light of case law approach
