COURSE SYLLABUS

Geografia e Didattica della Geografia con Laboratorio

1819-2-G8501R014

Course title

Geografia e didattica della geografia

Topics and course structure

The course aims to introduce students to human geography and its most recent problems trying to communicate the richness and vastness of the subject.

Human geography studies the relationships between human communities and the natural environment in their territorial expression. The course deals with some of the central themes of the discipline: culture, languages and religions, ethnic geography, gender, development and change, urban systems, political organization of space. During the course, particular emphasis will be given to the subjects being taught in primary school and how to transform them for children. We will also try to reflect on the ideological role of teaching geography at school and on the need to adopt a critical attitude towards the geographic "discourse"

Objectives

To know and to understand contemporary human geography and its basic topics.

To analyze the teaching of geography in primary school and the ideological function of school geography.

Methodologies

Lectures, seminars and PPT presentations.

A laboratory will be dedicated to the teaching of geographical concepts.

Students working in groups will have to design a didactic activity with the help of the conductor.
