COURSE SYLLABUS

Adolescenza e Alienazione

1819-5-H4101D139

Aims

To learn session procedures with adolescents to evaluate the degree of health.

Contents

Different and changing symptoms happening in healthy or pathologic adolescents are discussed together with evaluation methods.

Detailed program

Aim of this course is to think about alienation in Self-image disorders, character disorders, panick attacks, crisis and developmental breakdown in adolescents.

Clinical cases of adolescents will be discussed together with adolescent crisis and its meaning for the family. The clinical behaviour of the doctor in charge will be discussed altogether.

Prerequisites

Enrollment to the fifth year of Medicine.

Teaching form

Cases discussion in clinical workshops.

The course is divided into 2 sessions of 4 hours
