SYLLABUS DEL CORSO

Ecografia in Oncologia Ginecologica

1819-5-H4101D211

Aims

Contents

Pelvic US is considered (at least in Europe) the standard for the diagnosis of pelvic masses. Multiparametric score systems are able to improve the performances of this procedure in diagnosis of ovarian tumors. It has also a well defined role in presurgical staging and in follow-up of gynecological neoplasms. It is of the utmost importance in follow-up of patients with ovarian cancer after conservative treatment.

Detailed program

Transvaginal ultrasound

Diagnosis of pelvic masses

Diagnosis of endometrial cancer

Multiparametric scores

US staging of gynecologic malignancies

3D Ultrasound and color Doppler

Prerequisites

5th year medical student

Teaching form

Lectures

US clinics (Gyn Oncology)

Textbook and teaching resource

J.Bates – Practical Gynaecological Ultrasound – Cambridge University Press 2006

S.Kupesic – Color Doppler. 3D and 4D Ultrasound in Gynecology, Infertility & Obstetrics – Jaypee 2011

Semester**Assessment method**

Frequency certificate
