COURSE SYLLABUS

Cardiochirurgia nell'Adulto: Diagnosi Tecniche e Risultati

1819-4-H4101D078

Aims

Improvement of the knowledge on cardiac disease in the adult. Advanced analysis on emerging surgical techniques

Contents

Over the last 10 years, the refinement of technology and surgical strategy have dramatically improved the early and long term outcome.

The aim of this course is to present the more recent diagnostic techniques and the surgical strategies applied for the treatment of the cardiac diseases of the adults. The more recent guidelines will be presented. Moreover, some of the most important clinical trials will be discussed

Detailed program

Patho-phyisiology, diagnosis and treatment of myocardial ischemic disease

Patho-phyisiology, diagnosis and treatment of aortic valve disease

Patho-phyisiology, diagnosis and treatment of mitral valve disease

Patho-phyisiology, diagnosis and treatment of thoracic aortic disease

Patho-phyisiology, diagnosis and treatment of urgent and emergent cardiac disease

Prerequisites

Medical Students at 4th year and over

Teaching form

Lectures

Textbook and teaching resource

Cardiac surgery in the adult (online su www.ctsnet.org)

Semester

Assessment method

Interactive verification at the course conclusion

Office hours
