

# UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

### **COURSE SYLLABUS**

## **Basic Pharmacology**

1819-2-H4102D012

#### **Aims**

The objective of this course is to provide the general principles of pharmacology. Topics including pharmacokinetics and pharmacodynamics will be discussed. The course content emphasizes drug mechanisms, drug development and post-marketing surveillance.

#### **Contents**

The course will examine the general principles underlying the destiny of drugs within the organism and the mechanisms responsible of their therapeutic and toxic effects. In addition, the preclinical and clinical processes of drug research and development, the post-marketing surveillance, drug patenting and access will be discussed.

### **Detailed program**

INTRODUCTION: Drug definition, Brief history of pharmacology, Routes of administration PHARMACOKINETICS: Absorption, Bioavailability, Distribution, Body compartments, Volume of distribution, Phase 1 and 2 reactions, First-pass metabolism, Excretion, First- and zero-order kinetics, Therapeutic window -TARGETS OF DRUG ACTION: Common drug mechanisms, Receptors, enzymes, ion channels, and transporters, New drug mechanisms, Protein-based, gene-based, and cell-based therapies – PHARMACODYNAMICS: Receptor and ligand binding, Dose response relationships, Individual variation, Pharmacogenetics - DRUG TOXICITY: Toxic and lethal dosing. Mechanisms of drug toxicity. Drug interactions, Adverse drug reactions, Drug abuse and dependence - DRUG DISCOVERY AND DEVELOPMENT: Drug discovery and design, Preclinical drug development, Clinical drug development, Post-marketing surveillance, Chemical and biological drugs, Generics and biosimilars - PHARMACOECONOMICS: Drug patents and access.

### **Prerequisites**

Knowledge of human anatomy, physiology, pathology, chemistry, biochemistry.

### **Teaching form**

Formal lectures employing active teaching methodology and small-group interactive activities with problem solving and clinical case discussions.

### Textbook and teaching resource

Goodman & Gilman's: The Pharmacological Basis of Therapeutics, Thirteenth Edition, McGraw Hill

### **Semester**

First semester.

### **Assessment method**

Written test with closed questions (true/false, multiple-choice quizzes) and open questions about clinical cases.

#### Office hours

Upon appointment.
