SYLLABUS DEL CORSO

Tirocinio in Chirurgia Orale I

1819-5-H4601D028-H4601D074M

Aims

The course aims to contribute to the training of students in dentistry and dental prosthesis providing the necessary knowledge of oral surgery.

Assist students in tackling basic surgery and various problems with particular attention to complications that may arise.

Contents

The purpose of the internship is to provide the fundamental practical bases for dealing with the various problems that the discipline proposes.

The diagnostic and therapeutic problems of the most frequent pathological forms of surgical relevance of the oral district and the clinical case studies with long-term results are evaluated in detail.

Detailed program

Diagnostic
anamnesic overview of the patient

Dental
radiology: orthopantomography and tac
