DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Metodologia Clinica A

1920-3-H4101D257-H4101D039M

---

#### Aims

Patient's history taking, with focus on cardiovascular and respiratory problems, Diagnostic assessment with critical data interpretation, Physical examination, Main clinical signs and symptoms. Knowledge of normal ranges of the main diagnostic tests for the cardiovascular and respiratory systems.

#### Contents

Collection and interpretation of patients' medical history, main signs and symptoms of cardiovascular and respiratory diseases. To provide the tools for the correct use of biochemical tests, and the definition of their indications and interpretation. Information on how to perform correctly a physical examination with particular regards to venous and arterial vessels, as well as to cardiovascular and respiratory systems.

#### Detailed program

CLINICAL METHODOLOGY A

-

#### The medical history

- Techniques of history taking
- Evaluation of patient's clinical data and files

- How to interview a patient
- Doctor-Patient interaction, physician's attitude and behaviour
- The role of the family history
- Physiological and pathological history

### **General physical examination**

- Head and neck
- Chest
- Abdomen

### **Diagnostic tests in Cardiology**

- Electrocardiography (EKG), 24 hours EKG Holter recording
- Echocardiography
- Exercise Stress Testing
- Cardiac nuclear imaging
- Computed Tomography and Magnetic Resonance of the Heart
- Coronary Angiography

### **Systemic Hypertension (primitive and secondary forms):**

- Clinical management
- Interpretation of diagnostic tests
- Therapy

### **Chest Pain**

- Approach to the patient with chest pain, differential diagnosis and diagnostic tests

### **Congenital Heart Diseases**

- Physiological and hemodynamic aspects of structural changes in the muscle and heart valves

## **Semeiotics of pain**

- Somatic pain and visceral pain
- Chest, abdominal, radicular pain and headache

## **Pericardial, endocardial and myocardial diseases**

- Pathophysiological mechanisms of pericarditis, endocarditis and myocarditis
- Signs and symptoms of the disease, its evolution and worsening
- Clinical management based on current international guidelines
- Follow-up and interpretation of instrumental and laboratory examinations

## **Ischemic heart disease**

- Stable and unstable angina
- Myocardial infarction
- Pathogenetic mechanisms

Signs and symptoms of the disease, its evolution and aggravation

- Acute and chronic patient management
- Planning and interpretation of instrumental and laboratory examinations

## **Pulmonary embolism**

- Pathophysiology
- Main etiological factors
- Clinical presentation
- Diagnostic process and follow-up

## **Pulmonary hypertension**

- Pathophysiology
- Main etiological factors
- Clinical presentation

- Diagnostic process and follow-up

## **Prerequisites**

Propaedeutic skills

## **Teaching form**

Lectures and exercises

## **Textbook and teaching resource**

Harrison's: "Principles of Internal Medicine" Ed. McGraw Hill

## **Semester**

1st semester

## **Assessment method**

Written and oral test. Multiple choice test comprising 30 questions with only one correct answer (among 5) aimed at evaluating global comprehension of course program. Each correct answer is scored 1.

## **Office hours**

On appointment
