

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Scienza delle Finanze - A-L

1920-1-A5810003-AL

Learning objectives

- 1) Provide the students with the basic notions which are required to understand main economic phenomena.
- 2) Allow the students to understand the reasons and the implications of the State intervention in decentralised market-based economies.

Contents

Scienza delle finanze is the only mandatory course with economic contents taught during the 5-years programme. On the one hand, the new syllabus is aimed at providing students with an historical perspective on the reasons of prevalence and on the fundamental features of the capitalistic economic system and, on the other hand, it is aimed at analyzing the main economic concepts in the context of contemporary economies. The course can be divided into two parts, the first devoted to the historical perspective and to provide some basic economic notions and the second which focuses on the study of social interactions as well as on the reasons and tools used by the government to intervene in the economy. In turn, each part is divided into 3 units. Basic knowledge of algebra and geometry is required.

Detailed program

EXAMS FROM MAY 2020 ONWARDS

The University is elaborating some guidelines for written exams during the CoVid19 emergency. The course instructor will follow these guidelines adapting them to this course. It is very likely that the exam will be based on some applications that are available exclusively on the e-learning platform.

CONSEQUENTLY, STUDENTS WHO WANT TO GIVE THEIR EXAM FROM MAY 2020 ONWARDS MUST SUBSCRIBE TO THE ELEARNING PLATFORM OF THE COURSE AS SOON AS POSSIBLE IF THEY DID NOT ALREADY DO IT.

Textbooks and Reading Materials

Course material, including slides, examples and exercises, will be made available through the elearning platform by the end of the week of their use in class.

For units 1-5 the reference book is ["The Economy"](#). For unit 6 please contact the course instructor.
