SYLLABUS DEL CORSO

Microeconomia - A-Le (blended)

1920-1-E1801M059-E1801M088M-T1

Learning objectives

The course provides students with the conceptual tools necessary for the examination and interpretation of the main economic phenomena. The final aim is the acquisition of skills related to learning, investigation and analysis, with particular reference to microeconomics and the historical development of economic systems. The students learn to face the problems of the economic systems, demonstrating the understanding of the concepts expressed in the basic literature, also through the recognition of models that exemplify the theoretical concepts. The course also provides students with the conceptual tools and information necessary for the examination and interpretation of the main historical-economic phenomena. The final aim is the acquisition of skills related to learning, investigation and analysis, with particular reference to the historical development of economic systems. Students learn to face the problems of their economic systems, placing them in a long-term dimension and demonstrating their understanding of the main transformations that the economy has undergone over time.

Contents
