COURSE SYLLABUS

Business Administration - 1

1920-1-E1803M046-T1

Learning objectives

The course of *Economia aziendale* addresses key issues related to business administration and management. Students should gain a better understanding of the creation of value and the processes through which the business (*Azienda*) is managed in several kinds of economic institutions: families, firms, public administrations and not-for-profit organizations.

The course provide students with both conceptual frameworks and examples to identifying, analyzing and understanding the key structural elements of *Azienda*. Students are asked to actively participate in the learning process.

Contents

- **Types of economic institutions**
- **Business operations**
- **Business operations**
- **Financial management**
- **Management Control Systems**
- **Organizational Structures and people management**

- **Managing the firm**

Prerequisites

None

Teaching methods

Traditional lectures, case analysis and discussions. Learning materials will be delivered through web-based technologies.

Assessment methods

The assessment requires written plus an additional oral exam. The written exam includes multiple choice questions, exercises and open questions. During the course two written tests will take place. A positive assessment allows students to go directly to the additional oral exam (optional).

Textbooks and Reading Materials

Economia aziendale, Alberto Nobolo (ed.), Pearson, Milano, 2017.

Semester

First semester
