

SYLLABUS DEL CORSO

Tecniche del Colloquio

1920-3-E2401P029

Learning area

4: Knowledge about qualitative and quantitative research methodology

Learning objectives

Knowledge and understanding

- General themes and methodological approaches regarding a psychological diagnosis
- Clinical reasoning
- Data organisation

Applying knowledge and understanding

- The different contexts in which a clinical interview is used
- Ability to extrapolate data and formulate hypotheses from reading/listening to patient protocols
- --

Contents

The course aims to support the acquisition of fundamental knowledge about the theory and technique of psychological interview. _____

Detailed program

- Theoretical fundamentals and methodological approaches regarding a psychological diagnosis
- The different typologies of interview
- The different contexts in which a clinical interview is used
- Interview Techniques
- The clinical reasoning
- The diagnostic alliance
- The clinical interview
- The interview for the bio-psycho-social data
- The interview with the parents
- ———

Prerequisites

Nothing specific. A good knowledge of the basis of Psychology enables a more aware use of the course contents.

Teaching methods

In addition to classroom lectures, part of the teaching will take place through the discussion of case studies and audio material.

The material (slides and, when possible, scientific articles) is made available on the e-learning site of the course, so that it can also be used by non-attending students.

Assessment methods

The exam is written with two open questions. The questions are aimed at ascertaining the effective acquisition of both theoretical knowledge and the ability to apply them to the reality. The evaluation criteria are: the correctness of the answers, the ability to argue, synthesize, create links, and critically read the reality.

For those students who request it, an oral interview is also provided, on all the topics of the course, which can lead to an increase or decrease of up to 3 points compared to the score of the written exam.

For attending students there will be in-itinere tests (two written tests, one at half semester, the second at the end) and a supplementary oral examination, if required, which allows to increase or decrease by 2 points the score

obtained through the two in-itinere tests.
