Prerequisites

None

Teaching methods

Up-front lessons, largely complemented by the analysis of official statistics on the topic at hand.

Assessment methods

The exam is written and oral.

The exam aims at assessing the students' understanding of the measurement of economic phenomena and their ability to classify, resume and apply the main economic statistics and the characteristics of the respective surveys.

Textbooks and Reading Materials

- Enrico Giovannini, 2015, Le Statistiche Economiche, second edition, Il Mulino.

- Methodological manuals by ISTAT.

extra reading among :
