## SYLLABUS DEL CORSO

### Anatomia e Fisiologia della Riproduzione Umana

1920-2-I0102D903

---

#### Aims

At the end of the course the student will know the female genital tract anatomy and the human procreative process. The student will also know the embryonic development and the anatomy and physiology of the placental organ.

#### Contents

The course provides to the student the fundamentals of anatomy and physiology of the female genital tract, of the human reproductive system, and the knowledge about the fertility and procreative process, from fertilization to embryonic development. The course provides to the student the anatomy and physiology of the placental organ.

#### Detailed program

**MED.40 GENITAL TRACT ANATOMY:** female and male genital tract anatomy. **MED.40 HUMAN REPRODUCTION AND PROCREATION:** reproductive function. The sterility. Medically assisted procreation. Conception, embryonic development and human fetal development. **FERTILITY AND PROCREATION:** Female sexual neurophysiology: normality and dysfunction. Natural fertility regulation. "Lactational Amenorrhea Method" (LAM). Midwifery counseling in the family planning and in case of fertility problems. **MED.03 GENETIC CAUSES OF POLYABORTIVITY AND PRENATAL DIAGNOSIS:** Genetic causes for poliabortivity/sterility.

## Prerequisites

none

## Teaching form

Lectures, practice exercises and group work.
