SYLLABUS DEL CORSO

Pediatria

1920-2-I0302D010-I0302D038M

Aims

The student is expected to learn basic concepts related with diagnosis, treatment and outcome of hematological diseases in pediatrics

Contents

The aim of the course is to provide students with basic concepts of pediatric hematology, including malignant and non malignant diseases and hematopoietic stem cell transplantation

Detailed program

- Non malignant hematological diseases (focus on hemoglobinopathies and thrombocytopenia)
- Pediatric Leukemias, focus on acute lymphoblastic leukemia
- Pediatric Lymphomas, focus on diagnostic and therapeutical issues
- Hematopoietic stem cell transplantation: who, what, how, when, why

Prerequisites

Teaching form

Lectures

Textbook and teaching resource

1. Teachers will provide educational material.
2. Nelson, textbook of pediatrics (only the chapters dealing with oncohematology)

Semester

2nd semester

Assessment method

Multiple choice test comprising 20 quiz with only one correct answer (out of 4) aiming at evaluating global comprehension of course program. Each correct answer is scored 1.5
