COURSE SYLLABUS

Medical Emergencies and First Aid Procedures

2021-3-H4601D014-H4601D040M

Aims

At the end of the course the student should know: Treatment of main emergencies in the dental practice.

Contents

The teaching module offers a detailed discussion of the pathophysiology of the main emergencies in the dentistry practice.

Detailed program

Coma - Anaphylaxis - Cardiopulmonary resuscitation during cardiac arrest.

Prerequisites

Knowledge of all preparatory disciplines.

Teaching form

Formal lectures and practical demonstrations.

During the Covid-19 emergency period, lessons will take place in synchronous videotaped lessons

Textbook and teaching resource

Anesthesia for odontostomatology and emergency medicine, 3rd ed. Manani et al. Ed. Idelson.

Semester

First semester.

Assessment method

An oral examination is employed to test students' knowledge of the level of knowledge through written examination.

The examination is aimed to test students' knowledge acquired in the different modules of the course.

During the Covid-19 emergency period, oral exams will only be online. They will be carried out using the WebEx platform and on the e-learning page of the course there will be a public link for access to the examination of possible virtual spectators.

Office hours

Upon appointment.
