

# UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

## **SYLLABUS DEL CORSO**

## Bioingegneria Elettronica e Informatica B

2021-4-H4101D020-H4101D080M

#### **Aims**

Provide students with the basic knowledge on diagnostic imaging techniques, in terms of physical principles, instrumentation and image formation process.

#### **Contents**

Image diagnostics instrumentation

## **Detailed program**

Physical principles, instrumentation and image formation in:

- Conventional Radiology
- Computed Tomography
- Echography
- Magnetic Resonance
- · Scintigraphy and Single Photon Emission Computed Tomography
- Positron Emission Tomography

## **Prerequisites**

Physics basic knowledge

## **Teaching form**

Lectures

## Textbook and teaching resource

Slides presented during the course

## Semester

Second semester of the fourth year

## **Assessment method**

4 multi-choice quiz on image diagnostics techniques, inside the whole course exam, and 1 oral question.

## Office hours

By appointment fixed by e-mail
