COURSE SYLLABUS

Music and Music Teaching (with Workshop)

2021-5-G8501R028

Course title

Music as a lifelong learning opportunity.

Topics and course structure

Music moves us – that is obvious. Far less obvious, however, is to understand and express *how that happens* within a single piece. Thus, analyzing a piece with regard to its expressive value, means to understand this piece, both as a whole and in every detail. The course will focus on a piano piece where music conveys emotions in a rich, sophisticated and surprisingly intense way.

Objectives

The aim of the course is to increase students' awareness of the musical language, of its expressive powers, and of the relationships between structure and emotions. All this will be meant as a possible standpoint on musical education and didactics.

Methodologies

The course will be held in Italian.

The course is conceived and held as an highly interactive workshop. The teacher will play the piano pieces extensively, asking students to express their impressions that he, in turn, will discuss, refine, and connect, leading the audience to the next listening occasion and so on, in a circular process of construction of a shared knowledge.

Due to the ongoing pandemic, lessons will be held through on line recorded videos, plus on line videoconferences with students.

Online and offline teaching materials

Due to the ongoing pandemic, lessons will be fully recorded and available on the elearning page of the course.

On the elearning page "Laboratorio di Musica e didattica della musica", students will find also the videos focusing on the practice of didactis of music (see below).
