The school as a social, cultural and learning context; school regulations and customs;

Class menagement; The communication in the classroom; observation and documentation; justice in classroom.

The educational relationship in its affective, cognitive, sociale and enviromental aspects (and their reciprocal interrelation),

that contribute to making the teaching-learning process more of less effective. Role and expectation of the teacher; ideas

and representations of child and pupil.

In particular, the cours topics will be as articulated:

The educational sciences today; The places of education; Educate at school; The teacher/pupils relationship; The management of the class group; Learning, emotions and corporeality at school; The class/pupils group; The school space; ; The law and the school; The family school relationship; Educational work in services; innovative

preschools and schools; school in the hospital and home education.

Objectives

With teaching and a constant and participated attendance to the lessons and the Laboratory connected to the course, we intend to promote the following learning in terms of:

1. Knowledge and understanding of the psychological, sociological and pedagogical disciplines involved in the field of educational sciences, with particular attention to the historical-social development and current of these areas of knowledge;

2. Understanding of the role of the educational sciences, and in particular of pedagogy, in the analysis and planning of school contexts and of didactic action;

3. Knowledge and understanding of the main problems related to the definition of the teacher's role and professional profile, with attention also to social and historical aspects;

4. Use the theoretical references essential to understand the dimensions and variables implicit in the teaching-learning process;

5. To use the theoretical knowledge and operative tools connected to the observation techniques to understand the characteristics of the scholastic context, subjects and relationships, as well as of the educational action.

Methodologies

Lessons, exercises; video and discussions in the classroom

Online and offline teaching materials

Articles, documents, excerpts form texts that will be used during the lessons and will be made available to all students
on the course website.
To consult the materials, notices and information, students will have to access the Moodle platform.

Gardner H., Sapere per comprendere. Discipline di studio e disciplina della mente, Feltrinelli, Milano

Meirieu P., Fare la Scuola, fare Scuola. Democrazia e pedagogia, Milano, FrancoAngeli, 2015

Assessment methods

Written and oral examination. The exam consists of two part, a written part and a subsequent oral part: the written part must be passed (from 18 to 30 marks, or more) before student can enrol for the oral exam.

The written part of the exam will be on all the texts in the bibliography.

Passing the oral exam allows access to the oral exam without repeating the written test for the two years of validity of the course. The oral exam will be on every text in the bibliography.

We remember that before enrolling for the oral exam the students have to pass the laboratory.

Written:

- ability to grasp the essential elements of the proposed topic;

- ability to synthetically expose the proposed topic;

- spelling and syntactic precision;

Oral:

- ability to present the proposed topic in an orderly and complete manner;

- ability to relate various perspectives on the topic present in the suggested texts.

Office hours

The professor is available to students on Tuesday from 10 am to 11 am - room 4110 - U6 - IV piano. Any change will be promptly announc

Programme validity

The programs are worth two academic years
