

UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Physiology

2021-4-H4102D024-H4102D080M

Aims
The course aims to provide the
Contents
cardiac physiology and adaptations (in health and disease); p
Detailed program
The heart

- Structural and functional aspects of cardiac excitation-contraction coupling and its modulation (inotropy, lusitropy)
- The cardiac mechanical cycle (on pressure/time and pressure/volume planes) definition of "systolic" and "diastolic" functions and their coupling.

- Cardiac "mechanical" and "chemical" work relation to cardiac O_2 consumption (myocardial efficiency)
- Cardiac adaptation to preload and afterload changes in health and disease
- Principles of cardiac (systolic and diastolic) functional measurements (invasive and imaging)

The systemic circulation

- Large arteries dynamics: windkessel mechanism, pressure pulse and its propagation
- Small arteries: regulation of peripheral resistance (intrinsic, neural, paracrine)
- Systemic pressure/flow relationship peculiarities of the coronary circulation
- Determinants of capillary pressure mechanisms of "edema"
- Mechanisms of venous return (preload maintenance and regulation)

The pulmonary circulation

- Structure-function peculiarities
- Pulmonary vascular resistance : definition, regulation and measurement

Regulation of cardiovascular function

- Pressure / volume homeostasis (neural and endocrine)
- Adaptation to physiologic demand (exercise, gravity, pregnancy etc)

Prerequisites

- Fundamentals of human physiology module (by Profs. Sancini and Rivolta)
- English language

Teaching form

- During COVID-19 emergency period, the lectures will be held
- All course activities will be held in English language

Textbook and teaching resource

- Guyton and Hall Textbook of Medical Physiology 14 edition. Elsevier 2020, Chapters III (The Heart), IV (The Circulation) and VII (Respiration)
- Mohrman DE, Heller LJ. Cardiovascular Physiology 9th edition. McGraw Hill 2018
Semester
- First semester
Assessment method
Oral exam:
In the event of pandemic emergency period, only telematic exams will be available. They will be carried out using the WebEx platform and on the e-learning page there will be displayed a public link where possible virtual spectators may get access and assist to the examination.
Office hours
By email appointment:
