COURSE SYLLABUS

Paleogenetics: Lessons From Prehistory

2021-3-H4102D064

Aims

Acquiring a deep insight into recent developments of the paleogenetics field, with particular emphasis on its potential application to biology and medicine

Contents

PALEOGENETICS: LESSONS FROM PREHISTORY

Detailed program

Genetics of complex phenotypes
Paleogenetics
Applications of machine learning techniques to paleogenetics
Applications of paleogenetics to biology and medicine

Prerequisites

From the 1st year of the course of Medicine and Surgery

Teaching form

Frontal lectures

Textbook and teaching resource

Lesson materials

Semester

Assessment method

Contribution to discussion

Office hours
