SYLLABUS DEL CORSO

Biologia

2021-1-I0201D127-I0201D183M

Aims

The course aims at developing the students' understanding of the basic mechanisms that regulate molecular organization, cellular and subcellular morphology.

Contents

The cell.
Organization of cellular space. The cytoplasmic membrane. The mitochondria. Meaning of biological macromolecules. Molecular mechanisms essential to cellular life.

Detailed program

The cell as a functional unit. Organization of cellular space in functional compartments. The cytoplasmic membrane as protection, selection and mediation structure. The power source of the cell: the mitochondria.

Meaning of biological macromolecules (DNA, RNA, proteins, lipids, carbohydrates). Cellular junctions and signal transmission. Molecular mechanisms essential to cellular life. DNA replication. RNA transcription. Protein synthesis

Prerequisites

None

Teaching form

Lessons in the presence of the teacher.

During the Covid-19 emergency period, lessons will take place in physical presence of the teacher or Asynchronously online as well as recorded. The videotaped lesson will be made available on elearning in asynchronous during the day in which the lesson will be held

Textbook and teaching resource

Resources distributed during the course by the teacher and published in e-learning

Semester

First semester

Assessment method

Written exam: quizzes with multiple choice.

During the Covid-19 emergency period the exam will take place electronically with proctoring control.

Office hours

Reception by appointment
