## SYLLABUS DEL CORSO

### Anatomia e Cinesiologia

2021-1-I0201D129

---

#### Aims

#### Contents

After the module the student will be able to accurately describe the movement of the joints of the human body segments using the appropriate vocabulary. The course aims at developing the students' knowledge of structure and function of the human body and its systems, with particular attention to the morphofunctional aspects of the musculoskeletal system, to develop the student's knowledge of the morphology of the bones, muscles and joints of the human body, their mutual relations and their function, biomechanics and kinesiology of the joint. The student will be able to make appropriate use of terms that identify the reference planes and the parameters that describe the movement kinesiology.

#### Detailed program

#### Prerequisites
