COURSE SYLLABUS

Postural Assessment

2021-1-I0201D130-I0201D190M

Aims

At the end of the course the student should :

- know the basic principles and application of the kinesiologic assessment.

- know the assessment of postures and implication of posture manteinance on the body musculature.

- know and analyze passages between postures.

Contents

Detailed program

- Differences between posture and position and general scheme for the kinesiologic assessment in every position.

- Standing posture

- Derived posture from standing and how to reach them: movement of the body from standing.

- Supine posture

- Sitting posture

- Posture on knees

- Intermediate posture

- Passages between postures (from supine to long sitting postures; Sit to stand and stand to sit; from posture on knees to intermediate posture; from intermediate posture to standing; from standing to posture on the toes)

- Climbing stairs

- Open and close a drawer in front of you

- Raising and lowering objects

Prerequisites

Teaching form

During the Covid-19 emergency period, the lessons will take place in a mixed mode: partial presence and asynchronous / synchronous video-recorded lectures
