SYLLABUS DEL CORSO

Neuroanatomia 2

2021-1-I0201D131-I0201D193M

Aims

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system

Contents

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system (somatic and autonomic)

Detailed program

Organization of the autonomic nervous system, ortosimpatic, parasimpatic

Spinal nerves: origin, ourse, innervation territories

Plexi and spinal nerves: peripheral trunks and constitution - encephalic nerves: origin, course, innervation territories.

Radiologic anatomy, topographic and clinic of the peripheral nervous system

Prerequisites

College-level scientific knowledge

Teaching form

Frontal lessons. During Covid-19 emergency, there will be only recorded, which will be uploaded on the e-learning platform within 1-2 days..

Textbook and teaching resource

- A. Vercelli, Anatomia Umana Funzionale, Minerva Medica
- Martini, Anatomia Umana, Edises

Semester

2nd term

Assessment method

Multiple choice written test, with the possibility to assess the level of competence by means of oral examination. During the Covid-19 emergency the examination will be performed exclusively online by the Webex platform (the link to attend to the examination will be posted on the E-learning page of the course).

Office hours

Mon-Fri by appointment
