## COURSE SYLLABUS

### Neuroanatomy 2

2021-1-I0201D131-I0201D193M

---

#### Aims

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system

#### Contents

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system (somatic and autonomic)

#### Detailed program

Organization of the autonomic nervous system, ortosimpatic, parasimpatic

Spinal nerves: origin, ourse, innervation territories

Plexi and spinal nerves: peripheral trunks and constitution - encephalic nerves: origin, course, innervation territories.

Radiologic anatomy, topographic and clinic of the peripheral nervous system

#### Prerequisites

College-level scientific knowledge

## **Teaching form**

Frontal lessons. During Covid-19 emergency, there will be only recorded, which will be uploaded on the e-learning platform within 1-2 days..

## **Textbook and teaching resource**

- A. Vercelli, Anatomia Umana Funzionale, Minerva Medica
- Martini, Anatomia Umana, Edises

## **Semester**

2nd term

## **Assessment method**

Multiple choice written test, with the possibility to assess the level of competence by means of oral examination. During the Covid-19 emergency the examination will be performed exclusively online by the Webex platform (the link to attend to the examination will be posted on the E-learning page of the course).

## **Office hours**

Mon-Fri by appointment
