DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Medicina Interna 3

2021-3-I0101D016-I0101D050M

---

#### Aims

INTERNAL MEDICINE –GERIATRICS:

Demography and biology of aging. Comprehensive assessment of the older subject and fall prevention. Principles of pharmacology applied to the elderly. Hydro-saline balance in the elderly. Chronicity, frailty, and clinical instability. Physiological and pathological brain aging.

Endocrinology: diabetes, hypo- and hypertiriodism. Incontinence and pressure sores. The network of services for the older patient. Ethical aspects of elderly care.

INTERNAL MEDICINE – ORTHOPEDICS

Knowledge and diagnosis of the main congenital pathologies and growth disorders. General principles of diagnosis and care of fractures from the emergency department to the definitive treatment and knowledge of the relative complications. Management of skeletal traction, cast and brace. Knowledge of the main aging pathologies such as arthritis, osteoporosis and fragility fractures

#### Contents

The course aims to:

- Describe the clinical picture of the main pathologies and geriatric syndromes related to the elderly person that can intervene on the body by altering its balance and indicate its therapeutic approach
- teach how to illustrate the pathophysiological mechanisms that determine the diseases and geriatric syndromes

- understand the manifestations of the diseases - both signs and symptoms – whose role represents one of the main variables influencing nursing.

## Detailed program

### INTERNAL MEDICINE - GERIATRICS

Demography and Biology of the aging. Comprehensive Geriatric Assessment (CGA). Chronicity: frailty and clinical instability end-of-life. Delirium. Orthogeriatrics care: the co-managed integrated model. The aging brain, physiological and pathological: dementias. The falls in the elderly. Sarcopenia. Hypokinetic syndrome.
