COURSE SYLLABUS

Complementary Treatments: Implications For Nursing Care

2021-2-I0101D141

Aims

Acquire useful experiences and knowledge to guide the development of one's professional skills. Analyze possible nursing relevance approaches. Recall the interest of nurses on the issue of complementary care. Update knowledge on normative references in the use of complementary care

Contents

The course aims to introduce some of the complementary care that can allow to provide nursing services increasingly qualified and complete in the interest of the person, in its deepest essence of being human. The event also aims to reflect on the evolution of the nurse's skills through an example of role expansion
