SYLLABUS DEL CORSO

Environmental Justice and Geopolitics of The Sea

2021-1-F7502Q039

Aims

Understanding of the main questions raised by studying oceanic and transnational spaces in a critical geopolitics perspective.

An advanced ability to critically analyze and interrogate scholarship and discourse framing the oceans, and the geopolitical dynamics underway to conquer sea-power.

An understanding of the major challenges (acidification, oil and gas drilling, overfishing, and, in the long term, deep-sea mining, bioprospecting, and geo-engineering) posed by the deep seabed.

An engagement with the challenges of inter-disciplinary study and research.

Contents

After a short introduction to the most recent theoretical approaches to political geography and critical geopolitics, the course focuses first on the historical representation of the ocean as a "political and social space" and on how the sea can be framed by international geopolitical discourse, in relation to the processes of territorialisation, geo-power and extra-territoriality of marine spaces. The second part relates to the geopolitics of the deep sea and in particular it focuses on the definition, value, ownership, access, health and future state of the resource-rich and highly contested sub-surface ocean.

Detailed program

Elena dell'Agnese

Part I - Political geography of the sea

The political geography of the sea: a classical approach (maritime boundaries and Law of the Sea, transport and trade, strategy and warfare)

A (critical) political geo-graphy of the sea? thinking about the sea / representing the sea / exploiting the "geopolitical features" of the sea

Geo-graphy and the power of representation /Dividing (and naming) the ocean sea: the East Sea/ Sea of Japan issue

The territorialisation of the sea /Territorial claims and islands disputes: the Dokdo-Takeshima issue

Geographical definitions and island disputes: the Sankeku-Diaoyu issue/ climate change and vanishing islands/reefs: Okininotori: a shima, or a reef'?

A classical approach to the geopolitics of the sea/ the myth of sea power: A.T. Mahan theoretical positions / China as a maritime power and the South China Sea competition (Spratly, Paracel and more)

Sea power, sea nodes and islands as U.S. bases: The Hawai'i and Pearl Harbor, Midway and Wake, Guam

Sea power, sea nodes and islands as overseas U.S. bases/ bases of empire and lily pads: Guantanamo, Micronesia and Marshall Islands, Okinawa, Diego Garcia

LSMPAs (Large Scale Maritime Protected Areas): conservation or geopolitics?

Extra-territoriality 1: Pirates as enemies of all nations The golden age of piracy and the "pirate commonwealth" against the "world political map", pirates of today, popular geopolitics of "pirates"

Extra-territoriality 3: Seasteading: "How Floating Nations Will Restore the Environment, Enrich the Poor, Cure the Sick, and Liberate Humanity from Politicians" (maybe)

Extra-territoriality 2: Cruising ships: Cruise tourism as an example of globalization? (History and Development, Crews, Employment, exploitation)

Prerequisites

An adequate grasp of the perspectives of the relevant social sciences (geography, politics, economics, law, and sociology).

Capacity of working according to multidisciplinary and interdisciplinary perspectives.

Teaching form
