SYLLABUS DEL CORSO

Lab. Capitale Sociale e Sistemi Socio-economici Locali

2021-2-F8802N024

Learning objectives

Develop skills and competencies to translate the theoretical concepts encountered during the course into empirical research strategies

Contents

Methodology and techniques for conducting social network analysis: introduction

Collection and analysis of empirical data for social network analysis: practical excercise (group work)

Detailed program

The workshop is aimed at equipping students with the basic competences and knowledge to transfer the theoretical concepts covered during the course into practical research activities

The first part of the workshop is aimed at deepening the basic concepts of social network analysis

According to students' research interests, they will be provided with datasets useful to learn how to describe, analyse and represent interpersonal and interorganizational networks

Examples of existing researches will be used in order to show how social networks can be analysed and represented through specific software

Prerequisites

Basic knowledge in sociology and methodology of social research, basic skills in the use of PC. Attending the lessons of the related course is highly reccomended.

Teaching methods

Frontal lessons and group excercises. During the Covid-19 emergency, lessons will be held adopting a mix method: some classess will be held face-to-face (at the University) other classess will be held remotely (live and recorded).

Assessment methods

Group presentation

Textbooks and Reading Materials

Learning materials will be provided by the teacher during the class (and will be available to download from the e-learning platform immediately before the class)
