COURSE SYLLABUS

Behavioral Economics For Decision Making

2021-2-F6302N027

Learning objectives

This course is intended to allow students to become familiar with the literature in behavioral economics and decision making. Major goals will be that of enabling students to gain understanding of the major aspects of behavioral decision-making under uncertainty, and applications to economics, politics and society.

Contents

This course is intended to allow students to become familiar with the literature in behavioral economics and decision making. While this approach is based on the experimental data about human reasoning (provided by cognitive psychology and neurosciences), students will be driven to test experimentally properties and assumptions on human decisions. Major goals will be that of enabling students to gain understanding of the major aspects of behavioral decision-making under uncertainty, and applications to economics, politics and society. The Course aims also at introducing the students to the psychological aspects of decision making in organizational, social and political context. In particular some special features of decisions in public policy and international politics will be deepened.

Detailed program

1.Reasoning, affect and gut feelings: decision making is also determined by emotional and _____
