

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Fondamenti di Bilancio

2021-3-E3301M202

Learning objectives

The student will be able to prepare the financial statements using accounting principles consistent with the status of the company.

The student will be able to understand the strengths and weaknesses of a company, through reading, analysis and revision of its financial statements. Through ratio analysis and flows analysis, with investigations on history and on future of the company, it is possible to distinguish healthy companies from companies with problems or situations of non-continuity.

Will be able to evaluate the Company's performance, integrating the economic and financial analysis with the assessment of social, environmental and governance risks (ESG)

Contents

In the first part the course explores the theme of the evaluations for the preparation of the financial statements, in the business theory as well as in the civil and tax laws, with reference to national and international accounting standards.

The second part addresses the issue of the financial statement as an instrument of communication of corporate strategies in an integrated dimension, framing the methods of reading, analysis and interpretation of the doctrine developed and applied in practice, for the purpose of evaluating the creditworthiness and prospects of development business

Analysis and evaluation of the financial statements of financial institutions.

Prerequisites

Financial Accounting

Teaching methods

During the Covid -19 emergency period, lessons will take place in mixed mode: two weekly meetings remotely in asynchronous mode (videotaped lessons), a videoconference meeting in synchronous mode, with active participation of the students through their personal computer.

We will try to facilitate the participation of students by group work, with the use of office programs, such as excel, for the preparation of the financial statements (balance sheet, income statement and financial statement) and for financial analysis.

Assessment methods

The exam includes a written part and an oral part.

The written part can be carried out with the option of two on-going tests, of a practical nature (exercises), the performance of which in the presence or at a distance depends on the progress of the pandemic, respectively on the first and second part of the course.

The oral exam includes discussion of the course topics, starting from a qualitative analysis of the financial statements of a listed company and from the quantitative analysis of the financial statements (at least three years) of a company chosen by the student.

For the preparation of these documents, the related models and the software to be used will be made available on the e-learning site. In the inability to use computer labs, the models to be used will be presented and discussed during synchronous lessons.

The oral exam with the interview on the topics covered in class and the discussion of the papers is individual and is expected electronically, except for a positive evolution of the pandemic.

Related information on the e-learning website of the course.
