UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Laboratorio: Colloquio: Metodi e Casi Clinici Esemplificativi - A

2021-3-E2401P124-A

Learning area

4: Knowledge about qualitative and quantitative research methodology

Learning objectives

Knowledge and understanding

- General topics and methodological approaches related to psychological diagnosis
- Clinical reasoning
- Data organisation

Applying knowledge and understanding

- The different contexts in which a clinical interview is used
- Ability to extrapolate data and formulate hypotheses by reading/listening to patient protocols
- Writing a report

Contents

The laboratory will begin with a brief introduction of the topic of how to give an intervies, with different frameworks. Then we'll focus on the clinical interview, referring to real clinical cases presented by video, that will be also discussed in small groups.

Detailed program

- Theory and practice of a clinical interview
- Clinical interview models
- Potential obstacles and how to overcome them

Prerequisites

Nothing specific.

Teaching methods

Discussions, working groups, practical training, group discussion on real clinical cases presented by video.

Lessons will be held in presence or through online video lessons, according to the University's regulations regarding the COVID-19 emergency situation. In both cases, all lessons will be video recorded and made available to the students.

Assessment methods

In order to pass the laboratory students will have to attend the 75% of the lessons. Credits acquisition is related to an evaluation of some group activities carried out during the lessons.

During the Covid-19 emergency, exams will be conducted according to the University's regulations regarding the COVID-19 emergency situation.

Textbooks and Reading Materials

Detailed information about the teaching material will be published on the e-learning page associated with the course.
