COURSE SYLLABUS

Environmental Risks Assessment of Chemicals (Curricular - Environment)

2021-94R-SCGA32

Title

Environmental Risks Assessment of Chemicals

Teacher(s)

Antonio Finizio

Language

English

Short description

The concepts of ecological risk assessment endpoints, defining the problem, the conceptual model, and risk hypotheses

- Explore methods for measuring, estimating, and characterizing exposure and effects for deterministic and probabilistic assessments
- Discuss how data are applied in the decision-making process

- Demonstrate how to communicate risk findings in a professional setting

Evaluation: YES - discussion on the program topics

CFU / Hours

2 CFU - 16 Hours (Lecture)

Teaching period

II semester
