Language

English

Short description

Topics

- role of public institutions and administrative thought
- digitalization of public institutions, services and commons
- independent administrations in European and Italian legal system

- regulation and enforcement in competition law
- budget and fiscal rules
- accountability and control
- public institutions and EU funding

Objectives of the program:

To understand the role and functioning of public institutions for the market and personal services; to understand the financial constraint applying to all public institutions; to reflect on the innovation connected to digitalization and the specific competences necessary to provide services for society.

Evaluation: Written assignments and elaboration of individual and group studies
