COURSE SYLLABUS

Physiology

2122-5-H4102D043-H4102D143M

Aims

The course aims to enable medical students to understand the physiological processes underlying the physiology of the gastrointestinal tract. This will provide them with the tools to consciously address the aspects related to the pharmacology and pathology of the GI tract itself.

Contents

The course is based on the systematic presentation of physiological concepts underlying the functioning of the digestive tract. The mechanism leading to function imbalance cannot be appreciated without a deep understanding of the underlying biophysical and physiological mechanisms. Therefore, we will present such mechanisms that guarantee functions at the cellular, tissue, organ and apparatus level and at the integrated level.

Detailed program

Functions and general characteristics. Structure of the gastro-intestinal tract. Secretion. Motility. Nervous control of the digestive function. Enteric nervous system. Electrophysiology of smooth muscle cells of the gastrointestinal tract. Hormonal control of motility of the gastrointestinal tract (gastrin, CCK, secretin). The oral cavity. The chemical senses of taste: physiology of taste and smell. Salivary secretion. Stomach and gastric secretion (composition and regulation). Intestinal secretions. Pancreatic secretion (composition and regulation). Liver secretion (composition and regulation). Digestion and absorption.

Prerequisites

Fundamentals of Human Physiology.

Teaching form

Lectures with interactive presentation and discussion. Whenever possible, clinical case analyzes will be proposed for the evaluation of the specific physiological parameters. In case of pandemic resurgence the lessons will be through webinar.

Textbook and teaching resource

Guyton & J.E. Hall, *Textbook of Medical Physiology*, Elsevier;
Boron WF, Boulpaep EL, *Medical Physiology*, Ed. Elsevier.

Semester

Second semester

Assessment method

The exam will be carried out in an integrated manner according to the modality envisaged by the vertical track

Office hours

The professor receives by appointment upon agreement by e-mail
