DEGLI STUDI DI MILANO-BICOCCA

## COURSE SYLLABUS

### Occupational Medicine

2122-4-H4102D030-H4102D114M

---

#### Aims

The aims of the course are:

- To learn the basic elements of the Occupational Medicine and of the prevention system in workplaces;
- To know the main risks in workplaces and their work-related diseases;
- To diagnose or to suspect the presence of an occupational disease;

#### Contents

The course provides students with knowledge and skills related to prevention and health protection in workplaces, and to occupational diseases.

#### Detailed program

- Human dimension of the work
- Introduction to the Occupational Medicine and regulatory framework
- Basic notions of prevention and classification of risk factors
- General and specific toxicology
- Occupational cancers

- Diseases caused by physical agents (noise, vibration, micro climate, ionizing and non-ionizing radiation)
- Work-related respiratory diseases
- Work-related skin diseases
- Ergonomics and risk of working with display screen equipment
- Work-related stress

## **Prerequisites**

Knowledge related to preparatory courses as specified in the regulation of the degree course.

## **Teaching form**

Lectures

In the Covid-19 emergency period classes will take place in mixed mode: partial presence and asynchronous / synchronous videotaped lessons or asynchronous remotely with events in synchronous videoconference.

## **Textbook and teaching resource**

Learning material provided by the teacher

## **Semester**

Second semester

## **Assessment method**

Written test with closed multiple-choice questions with only one correct answer and open-ended questions with brief answer.

During the Covid-19 emergency period, exams may be in oral or written form and will only be online.

## **Office hours**

By appointment requested by e-mail addressed to [giovanni.devito@unimib.it](mailto:giovanni.devito@unimib.it)
