SYLLABUS DEL CORSO

Gastroenterologia A

2122-3-H4101D258-H4101D047M

Aims

The primary goal of the course, composed by two modules, Gastroenterology A and Gastroenterology B, is to provide students with the pathophysiologic basis to understand the clinical and surgical semeiotics and the physiopathology of the digestive and endocrine system in order to make correlations between the inner mechanisms of diseases and their clinical expression. The student will be able to interpret symptoms, signs and laboratory tests as well as radiologic and endoscopic findings. Clinical tools to understand concepts of organ-limited disease, system involvement or systemic disease will be provided.

Contents

Motor disorders of the esophagus, gastroesophageal reflux disease and its complications, gastritis and gastropathies, peptic ulcer disease. Maldigestion and malabsorption. Crohn's disease and ulcerative colitis, celiac disease. Jaundice, cholelithiasis, viral hepatitis, chronic non-viral hepatitis, cirrhosis, portal hypertension. Hepatocellular carcinoma and cholangiocarcinoma. Constipation, diarrhea, irritable bowel syndrome, diverticular disease. Acute and chronic pancreatitis.
