

**UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA**

## **COURSE SYLLABUS**

### **Clinical Methodology A**

2122-3-H4101D257-H4101D039M

---

#### **Aims**

The Clinical Methodology Course is organized in two modules (A and B) and is aimed at the acquisition of the different methodologies for evaluating the patient with particular attention to the collection of anamnesis, physical examination and laboratory tests in the perspective of their subsequent application in the specialist field. The topics of the course constitute the necessary tools for understanding the semeiological basis and physiopathology of the main morbid conditions. The notions provided represent the indispensable basis for the acquisition of a scientific method applicable to all the specialized disciplines that the student will face in the course of his professional growth.

#### **Contents**

Collection and interpretation of patients' medical history, main signs and symptoms of cardiovascular and respiratory diseases. To provide the tools for the correct use of biochemical tests, and the definition of their indications and interpretation. Information on how to perform correctly a physical examination with particular regards to venous and arterial vessels, as well as to cardiovascular and respiratory systems.

#### **Detailed program**

**The medical history**

- Techniques of history taking
- Evaluation of patient's clinical data and files
- How to interview a patient
- Doctor-Patient interaction, physician's attitude and behaviour
- The role of the family history
- Physiological and pathological history

### **General physical examination**

- Head and neck
- Chest
- Abdomen

### **Diagnostic tests in Cardiology**

- Electrocardiography (EKG), 24 hours EKG Holter recording
- Echocardiography
- Exercise Stress Testing
- Cardiac nuclear imaging
- Computed Tomography and Magnetic Resonance of the Heart
- Coronary Angiography

### **Systemic Hypertension (primitive and secondary forms):**

- Clinical management
- Interpretation of diagnostic tests
- Therapy

### **Chest Pain**

- Approach to the patient with chest pain, differential diagnosis and diagnostic tests

- 
- Somatic pain and visceral pain
  - Chest, abdominal, radicular pain and headache

## **Prerequisites**

Propaedeutic skills

## **Teaching form**

Lectures and exercises

Lessons will be provided in presence, subject to any ministerial changes following the COVID pandemic situation

## **Textbook and teaching resource**

Harrison's: "Principles of Internal Medicine" Ed. McGraw Hill
