COURSE SYLLABUS

Clinical Methodology B

2122-3-H4101D257-H4101D040M

Aims

The Medical Surgical Pathology Course 1 is aimed at acquiring the various patient assessment methods with particular attention to the collection of the medical history, physical examination and laboratory tests with a view to their subsequent application in the specialist field. The topics of the course constitute the necessary tools for understanding the semeiological basis and physiopathology of the main morbid conditions. The notions provided represent the indispensable basis for the acquisition of a scientific method applicable to all the specialized disciplines that the student will face in the course of his professional growth.

Patient's history taking, with focus on cardiovascular and respiratory problems, Diagnostic assessment with critical data interpretation, Physical examination, Main clinical signs and symptoms. Knowledge of normal ranges of the main diagnostic tests for the cardiovascular and respiratory systems.

Contents

Collection and interpretation of patients' medical history, main signs and symptoms of cardiovascular and respiratory diseases. To provide the tools for the correct use of biochemical tests, and the definition of their indications and interpretation. Information on how to perform correctly a physical examination with particular regards to venous and arterial vessels, as well as to cardiovascular and respiratory systems.

Detailed program

Myocarditis

- Pathophysiological mechanisms of pericarditis, endocarditis and myocarditis
- Signs and symptoms of the disease, its evolution and worsening
- Clinical management based on current international guidelines
- Follow-up and interpretation of instrumental and laboratory examinations

Ischemic heart disease

- Stable and unstable angina
- Myocardial infarction
- Pathogenetic mechanisms

Signs and symptoms of the disease, its evolution and aggravation

- Acute and chronic patient management
- Planning and interpretation of instrumental and laboratory examinations

Primary and secondary prevention

- Dyslipidemia
- Uric acid
- DAPT and DAT
- Low grade chronic inflammation
- Cardiological rehabilitation

Prerequisites

Propaedeutic skills

Teaching form

Lectures and exercises (remote videoconference if needed depending on ministerial rules for COVID-19)

pandemia).
