DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Genetic Pathology

2122-2-H4101D255-H4101D029M

Aims

The primary goal of the course is to provide the students with the necessary tools to understand the pathological mechanisms of genetic diseases

Contents

Genetic pathology and molecular pathology

Detailed program

Mechanisms of genetic diseases. Classification of human diseases. Monogenic diseases. Genotype -Phenotype correlation. Exceptions to mendelian inheritance: mitochondrial disease and diseases of unstable repeat expansion. Epigenetic and imprinting defects. X inactivation mediated diseases. Complex diseases.

Prerequisites

propaedeutic courses

Teaching form

Lectures

Lessons will be provided in presence, subject to any ministerial changes following the COVID pandemic situation

Textbook and teaching resource

material provided by teacher

Semester

second semester second year

Assessment method

multiple choice test. possible oral examination.

Office hours

by appointment by mail request
