## COURSE SYLLABUS

### Surgery Clerkship 2b

2122-4-H4101D327-H4101D213M

---

#### Aims

The objective of the Surgical Area 2 internship B is the deepening of the path started in the previous Surgical Area 1 internship. At the end of this period the student must be able to demonstrate a correct approach and correct management of reported clinical cases. He must be able to hypothesize autonomously the different phases of the diagnostic-management process of the patient who refers to the structures of the surgical area and to identify the criticalities.

#### Contents

Practical activity carried out in relation to the clinical cases relating to the surgery section of the didactic hospital. Evaluation of the patient and his surgical preparation

#### Detailed program

The course aims to deepen the knowledge on the different pathologies that will arise Discussion of surgical principles and surgical techniques

Surgical techniques will be considered

#### Prerequisites

Those foreseen by the didactic regulation of the CdS

## **Teaching form**

The surgery internship provides for compulsory attendance at the various structures of the training network, subject to any ministerial changes following the COVID pandemic situation. The internship is carried out with the support of a tutor who guides the student in the knowledge of the diagnostic-instrumental procedures necessary for patient management. The student must actively participate in the management of cases of surgical interest, collaborating in the diagnosis of the pathology, in carrying out surgical interventions, in postoperative management.

## **Textbook and teaching resource**

The teaching resource will be related to the cases analysed during the internship

## **Semester**

The teaching period will be communicated according to a shift schedule approved by the tutors

## **Assessment method**

Evaluation by registration with judgement: attendance/not attendance

## **Office hours**

By appointment
