## COURSE SYLLABUS

### Medical-surgical Emergencies

2122-6-H4101D358

---

#### Aims

The course, organized in theoretical modules and training modules in the emergency room, provides the student with the skills to describe the fundamentals, pathophysiological mechanisms, clinical pictures, monitoring and treatment of the main urgent surgical diseases. It will also include intensive inpatient experiences characterized by primary patient care responsibilities and direct relationships with senior faculty

#### Contents

Evaluation of the patient's general condition. Guidelines for the restoration and maintenance of vital functions.

The internship in PS is divided into three shifts, all characterized by the same type of organization. Therefore the same syllabus will be presented for the three rounds
