UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Clerkship in Gynecology

2122-4-H4101D108

Aims

The student will experience the treatment of uncomplicated gynecologca pathologies, principles and indications of gynecological diagnostics examinations (transvaginal ultrasound, colposcopy, hysteroscopy). The student will experience the post-operative management of women who underwent gynecological surgeries. The student will also be able to assist gynecological laparoscopic, laparotomic or vaginal surgeries.

Contents

The student will follow a gynecologist during the daily practice in the gynecological surgical ward and in the outpatient clinic, including diagnostics (transvaginal ultrasound, colposcopy, hysteroscopy). The student will also be able to attend the surgical theatre.

Detailed program

At the beginning of the period, the daily activity of the student will be scheduled in order to guarantee an appropriate exposition to the activities listed above. In the same moment, specific tutors among the staff of the gynecological clinic will be identified for each day.

Prerequisites

Optional activity for students from the V year

Teaching form

Frequency in the gynecological ward and in the outpatient clinic. Frequency of the operative theatre, subject to any ministerial changes following the COVID pandemic situation
